

## COURSE OUTLINE

Carrage Co. 1		KSE OUT	LINE		1	
Course Code	20142					
Course Title	Physics (2)					
Course	20141 Physics (1)					
Prerequisite(s)						
Credit Hours	3					
Course Type	Lecture					
Course Delivery Method	Face-to-Face					
Required or Elective			programs a	nd computer science prog	ram	
Semester	Second semester 2					
Instructor Name	Yahya Al-Khatatbeh					
Instructor's email	y.alkhatatbeh@psu	y.alkhatatbeh@psut.edu.jo				
Instructor's Office Number						
Course Schedule	Sunday/Tuesday/Thursday (11:00-12:00, 12:00-1:00) and Monday/Wednesday (12:30-2:00)					
Office Hours	Sunday/Tuesday/T	hursday (10	0:00-11:00)	, Monday/Wednesday (1	1:30-12:30),	
	and by appointmen	t				
Assessment Tools &	Assessment Tool	Weight	Additiona	al Information		
Grading Policy	First Exam	N/A				
	Second Exam	N/A				
	Midterm Exam	30%				
	Final Exam	40%				
	Homework	12%	Number of	of counted HWs: 5		
	Quiz(zes)	18%	Number of	of counted quizzes: 4		
	Project(s)	N/A		1		
	Other	N/A				
Catalog Description	Electric Fields, Ga	auss's Law,	Electric P	otential, Capacitance and	Dielectrics,	
				Circuits, Magnetic Fields		
	Magnetic Fields, F				,	
General Course Objectives						
,	solve problems in electricity and magnetism based on fundamental laws of physics and provide a basic understanding of electric circuits.					
Textbook and Related	1. Physics for Scientists and Engineers with Modern Physics, by Serway and					
Course Materials	Jewett, 9th Edition					
	2. PSUT e-learning: https://elearning.psut.edu.jo					
Topics Covered and Level	Chapter 23: Electri	c Fields - Pa	ırt I		Week 1	
of Coverage	Chapter 23: Electri				Week 2	
	Chapter 24: Gauss's Law - Part I				Week 3	
	Chapter 24: Gauss's Law- Part II				Week 4	
	Chapter 25: Electric Potential- Part I			Week 5		
	Chapter 25: Electric Potential- Part II				Week 6	
	Chapter 26: Capacitance and Dielectrics- Part I					
	Chapter 26: Capacitance and Dielectrics- Part II					
	Chapter 20. Capac	nance and D	ielectrics-	Part II	Week 7	
	1			Part II	Week 7 Week 8	
	Chapter 27: Curren	t and Resist	ance			
	Chapter 27: Current Chapter 28: Direct	t and Resist -Current Cir	ance cuits- Part l	I		
	Chapter 27: Currer Chapter 28: Direct Chapter 28: Direct	t and Resist -Current Cir -Current Cir	ance cuits- Part l cuits- Part l	I	Week 8 Week 9	
	Chapter 27: Currer Chapter 28: Direct Chapter 28: Direct Chapter 29: Magne	t and Resist Current Cir Current Cir etic Fields- F	ance cuits- Part l cuits- Part l Part I	I	Week 8 Week 9 Week 10	
	Chapter 27: Currer Chapter 28: Direct Chapter 28: Direct Chapter 29: Magne Chapter 29: Magne	t and Resist Current Cir Current Cir etic Fields- Fetic Fields- F	ance cuits- Part l cuits- Part l Part I Part II	I II	Week 8 Week 9	
	Chapter 27: Curren Chapter 28: Direct Chapter 29: Magne Chapter 29: Magne Chapter 30: Source	tt and Resist Current Cir Current Cir etic Fields- Fetic Fields- Fes of the Ma	ance cuits- Part : cuits- Part : Part I Part II gnetic Field	I II I- Part I	Week 8  Week 9  Week 10  Week 11	
	Chapter 27: Currer Chapter 28: Direct Chapter 29: Magne Chapter 29: Magne Chapter 30: Source Chapter 30: Source	tt and Resist Current Cir Current Cir etic Fields- Fetic Fields- Fetic Fields- Fetic Sof the Mages of the Mag	ance cuits- Part : cuits- Part : Part I Part II gnetic Field	I II I- Part I	Week 8  Week 9  Week 10  Week 11  Week 12	
	Chapter 27: Currer Chapter 28: Direct Chapter 29: Magne Chapter 29: Magne Chapter 30: Source Chapter 30: Source Chapter 31: Farada	tt and Resist Current Cir Current Cir ctic Fields- F ctic Fields- F es of the Mag y's Law	ance cuits- Part : cuits- Part : Part I Part II gnetic Field	I II I- Part I	Week 8  Week 9  Week 10  Week 11  Week 12  Week 13	
Expected Level of	Chapter 27: Currer Chapter 28: Direct Chapter 29: Magne Chapter 29: Magne Chapter 30: Source Chapter 30: Source Chapter 31: Farada Chapter 32: Induct	tt and Resist Current Cir Current Cir ctic Fields- F ctic Fields- F es of the Mag y's Law	ance cuits- Part : cuits- Part : Part I Part II gnetic Field	I II I- Part I I- Part II	Week 8  Week 9  Week 10  Week 11  Week 12	
Expected Level of Proficiency for Students	Chapter 27: Currer Chapter 28: Direct Chapter 29: Magne Chapter 29: Magne Chapter 30: Source Chapter 30: Source Chapter 31: Farada Chapter 32: Induct Mathematics	tt and Resist Current Cir Current Cir ctic Fields- F ctic Fields- F es of the Mag y's Law	ance cuits- Part : cuits- Part : Part I Part II gnetic Field	I II I- Part I I- Part II Good	Week 8  Week 9  Week 10  Week 11  Week 12  Week 13	
Proficiency for Students	Chapter 27: Currer Chapter 28: Direct Chapter 29: Magne Chapter 29: Magne Chapter 30: Source Chapter 30: Source Chapter 31: Farada Chapter 32: Induct Mathematics	tt and Resist Current Cir Current Cir ctic Fields- F ctic Fields- F es of the Mag y's Law	ance cuits- Part : cuits- Part : Part I Part II gnetic Field	I III II-Part I II-Part II Good Good	Week 8  Week 9  Week 10  Week 11  Week 12  Week 13

No	Course Learning Outcomes (CLOs)	Student Outcomes (SOs)
1	Provide and define the fundamental properties of the electric charge, solve	1
	technical problems associated with the electrostatic force (Coulomb force),	
	the electric force field, Gauss's Law, the electric potential, and potential	
	difference, within a framework of distributed symmetric charge	
	distributions, using calculus.	
2	Define electric capacitance and solve technical problems associated with	1
	capacitors of various symmetries, capacitors in series and parallel	
	combinations, and the microscopic effect of dielectric materials on	
	capacitance and stored energy.	
3	Define electric current, and current density, and solve technical problems	1
	involving DC networks of resistors, batteries, and capacitors, Ohm's Law,	
	Kirchhoff's Laws, and RC charging and decay circuits.	
4	Define the magnetic field and magnetic flux, and solve technical problems	1
	associated with the effect of static, non-uniform, and uniform magnetic	
	fields on moving charges and current-carrying wires, loops, and the	
	magnetic dipole.	
5	Calculate the magnitude and direction of the magnetic field for symmetric	1
	current distributions using the Law of Biot-Savart and Ampere's Law, and	
	state the limitations of Ampere's Law.	
6	State Faraday's Law of Induction with Lenz's Law and use these equations	1
	to solve technical problems associated with induction.	

## ABET – Student Outcomes (1-7)

- 1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
- 2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- 3. an ability to communicate effectively with a range of audiences.
- 4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- 5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- 6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
- 7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
